Research

brief description of past and current research and the fields of specialization

In the past, research was carried out on communication algorithms using space satellites to develop a bachelor's degree.

Currently, research is being carried out on the components and construction of drones to detect and implement the possibilities of extracting data from them.

Current Research Activities

titles of ongoing activities: please give the names and institutions of any international collaborators

Research on the components and construction of drones to detect and implement the possibilities of extracting data from them is done in the project called POLIICE (Powerful Lawful Interception, Investigation and Intelligence) financed by European Commission

Role/Activity

Please describe the project-specific role and activities you will undertake

As a part of the GPI team, I could be involved in WP1 (End-user coordination), WP2, WP5, and WP6 all tasks.

Period of Involvement (estimated)

*The period/dates for which you will be involved
and receive a stipend*

Start and end date of the project.

Publications

up to three recent publications relevant to this project plan

1. [redacted]
2. [redacted]
3. [redacted]

Honours

awards, fellowships, professional societies, etc.
